Founder & CEO | HealthyRoo Wellness

Smit Tanksale

A Melbourne-based engineer and developer, ***Smit*** leverages a Bachelor of Science in Electrical Systems from The University of Melbourne to bridge the gap between AI and proactive healthcare. He is the architect behind ***HealthyRoo's*** unified digital infrastructure, a platform currently screening over 70 health parameters to transform schools into preventive care hubs. With a technical background in R&D- including the development of an AI's hybrid operator architecture- he specializes in building "Curiosity Engines" and complex logic flows. ***Smit*** combines systems-thinking expertise with the high-pressure leadership of a competitive athlete to drive scalable, data-driven health solutions.

Whether commanding the pitch in cricket, football, or futsal, Smit embodies the passion, discipline and strategic foresight of a seasoned athlete. He loves training and mentoring younger sportsmen. Smit about himself,

*"My life as an athlete is the blueprint for how I build companies and mentor the next generation. I take pride in cultivating the sport, bringing the **unwavering discipline** of a wicket-keeper to the resilience needed in a startup. Whether maintaining a panoramic view on the pitch or driving coordination on the futsal court, my approach is rooted in **meticulous care** for team dynamics. I am fuelled by an **infectious enthusiasm** for high-pressure situations, believing the field is the ultimate training ground for leadership. By honing my own reflexes and supporting younger players, I ensure the spirit of the game thrives. This synergy between athletic rigor and entrepreneurial grit defines my journey."*
